

52 x 11" Comedy Adventures For 3-7yrs - Ready For Take-off Autumn 2017!

**MYRO** On A Mission!

# Funny, fast paced, full of action and drama... The science & technology in every story is real and exciting!

**"Calling all airplane fans!  
This is Myro, do you read me,  
OVER?"**

**Hi! I'm the smallest plane in the world!  
And this is my story!**

I was on a world tour with my pilot Michael, and we'd arrived in Australia which is, like, HUGE and totally AMAZING!

One day a storm blew us off course - you won't believe the storms you get in Australia - and we made an emergency landing near an old farm.

It looked very run down BUT it turns out

that I'd dropped right into the Flying Club which became my home and the coolest place in the Universe!

I've made some really fun new friends! We go on brilliant expeditions PLUS I'm now part of the Air Rescue Team which means AWESOME MISSIONS! My life just got super exciting!

*So will you come and share in my adventures?*

*You will? Great! Oh! Gotta fly! There's a baby kangaroo stuck in a billabong!*

**Myro's On A Mission!  
OVER and OUT!"**

**Inside every small child there's a hero waiting to burst out!**

***And as every small child dreams of flying, the best way to capture their imagination is through the eyes of a small plane!***

***So meet Myro, the smallest plane in the world!***

Set in the breath-taking Australian landscape, Myro's life is as thrilling as it is hilarious!

*One day he might be throwing buns at kangaroos to tempt them off runways... The next day he might be building bridges across rivers in raging storms!*

So there's plenty of action and suspense to keep pre-schoolers and their parents on the edge of their seats!

Myro's fantastic adventures are played out by a family of real characters with real emotions.

Warm, funny and diverse, Myro's friends (and frien-emies) provide great slapstick comedy and witty dialogue, whilst promoting tolerance, understanding, inclusivity and team work.

Every episode resolves a tricky situation in an age appropriate way.

The science and technology in every episode is real and exciting; authenticity is important as the planes can only do what their real-life counterparts can do - apart from talking, of course!

***So join Myro as he takes every small child on the flight of their lives!***

**All Myro Characters are Realistic and to Scale**
